**Subject:** NoRx File Repush - ACTION REQUIRED!

The NoRX file (also known as the 4RX gap file) that was pushed on 5/24 has been found to contain information from a prior version of the file. As a result, CMS retransmitted the May file to all Plans for which a file was created.

The transmissions to Plans that use Connect:Direct on the mainframe for connectivity may have failed if the prior file was not removed or renamed. The MMA Help Desk will work with these plans to address this situation and have the files resent.

The naming convention of the NoRX file is as follows: XXXXX = 5 Character Contract ID of sending entity.

**Gentran:**

P#MBD.#NORX.XXXXX.OUT.NTFCTN

**Connect:Direct (Mainframe):** zzzzzzzz = Plan-provided high level qualifier

zzzzzzz.P#MBD.#NORX.XXXXX.OUT.NTFCTN

**Connect:Direct (Non-Mainframe):**

\\[directory]P#MBD.#NORX.XXXXX.OUT.NTFCTN
